

January 13, 2026

About us:

Birchcliff Energy Ltd. is an intermediate oil and natural gas company based in Calgary, Alberta that is engaged in the business of exploring for, developing and producing natural gas and liquids. All of Birchcliff's assets are located in Alberta, where it is focused on the Montney/Doig Resource Play. Birchcliff's vision is to be an industry-leading producer of profitable and sustainable natural gas and liquids, with the objective of increasing shareholder value over the long-term. Birchcliff has a strong record of success, built on its core belief that outstanding people, combined with a great corporate culture, creates a winning environment. We are seeking a highly motivated and dedicated Completions Student to join our team for a valuable learning experience.

As a Completions Engineering Summer Student, you will have the opportunity to work closely with our experienced Completions team. This role will provide you with hands-on experience and exposure to various aspects of well completions and hydraulic fracturing operations. You will play a key role in assisting with data collection and analysis for performance evaluation, improving daily reporting, reviewing well records and supporting ongoing operations. As a highly integrated technical team, we advance our understanding in a multidisciplinary environment using a continuous improvement framework.

The term of the position is for **4 months**, with an anticipated start date in **May 2026**. We thank all applicants, however, only those meeting the minimum requirements will be considered for the position.

Key Responsibilities:

Projects are subject to individual experience and corporate priorities. Specific projects may include:

- Utilize data analytics to analyze well completions data, identify trends and make data-driven recommendations for improvement
- Assist with automating workflows to collect, process and interpret well completions data
- Support daily reporting improvements
- Apply machine learning techniques to detect operational anomalies
- Develop and improve KPIs and monitoring tools for operational performance tracking
- Perform completions cost analysis
- Office-based role with some field travel to completion operations

Education, Skills & Abilities:

- Current enrollment in at least a 3rd year Bachelor's degree program in engineering, or a related field.
- Strong academic performance and a passion for the oil & gas industry.
- Excellent analytical and problem-solving skills.
- Strong communication and teamwork skills.
- Experience with data visualization tools (e.g., Spotfire), data analytics, and machine learning techniques is an asset
- Experience working with databases and structured data is an asset
- Proficiency in R or Python coding is an asset.

- Experience with Excel, including formulas and basic automation (e.g., macros) is an asset
- Experience with completions and hydraulic fracturing is an asset
- Ability to work in our Calgary Office is required. Supervised travel to Field locations in Alberta may be required.

Application Process:

Interested applicants are invited to submit their resume to careers@birchcliffenergy.com with "COMPLETIONS SUMMER STUDENT" in the subject line of the email.
