

Reporting to the Warehouse Supervisor, this position will work collaboratively with Field Operations staff and the Facilities Construction leaders in ordering, receiving, distribution and inventory control with the goal of cost effectively managing our inventory of parts, equipment and supplies.

Key Responsibilities

- Meets with Operations personnel to determine priorities and materials requirements;
- Manages warehouse and remote storage locations and inventory of critical spare parts, motors, valves and fittings, etc. as well as consumables. Recommend inventory levels be changed, substitutions be made or new items be stocked;
- Within administrative guidelines, determines source of supply, maintains records of requisitions, receives and issues materials, and orders standard items regularly carried in inventory;
- Unloads, unpacks, inspects, checks packing slips against stock received loads; moves, stores and records the movements and storage locations of materials within the warehouse and other storage locations and as necessary inputs information on various data bases;
- Reconcile discrepancies and damage with vendors, trucking and courier companies, Accounts Payable and procurement staff, as required;
- Determines appropriate transportation methods and coordinates pickup and delivery of materials with trucking, courier companies, and vendors. Ensures proper packaging of goods, prepares bills of landing. As required, expedites the delivery of materials;
- Returns incorrect stock and obsolete parts to appropriate dealers or distributors;
- Completes housekeeping duties to maintain the warehouse in a clean, tidy and safe condition and keeps parts catalogues, databases and other reference materials current;
- Loads and unloads materials by hand or by the use of a mechanical forklift or skid steer;
- Drives a light truck to pick up and deliver materials when required;
- Ensures the security of the warehouse and other storage locations.

Knowledge, Skills and Abilities

- Knowledge of inventory control and warehousing practices;
- Proficient with required computer systems; Microsoft Suite
- Knowledge of eMaint by Fluke (Computerized Maintenance Management System) is an asset
- Ability to maintain records;
- Ability to establish and maintain effective working relationships;
- Physical strength and agility sufficient to perform the work of this class.

Training and Experience Requirements

- Minimum 3 years of practical parts/warehouse or electrical/instrumentation experience, preferably in the Oil and Gas Industry;
- A valid Class 5 Motor Vehicle Operator's License with a clean driver's abstract;
- Industry certification such as H2S Alive, Standard First Aid & CPR would be considered a definite asset.
